Figma Component Inventory & Prototype Requirements

Feira de Carros | Step 8 / 9 | Version 0.1 | 22 October 2026

Document status: REVIEW-READY • Not an approved Figma design, Figma source file, native purchase implementation or client sign-off.

Functional baseline: client-accepted SRS v0.3 and latest corrections. Source inventories: Steps 1–7. Implementation preferences: shadcn/ui and React Hook Form for web/Admin (proposed).

Source artwork for identification only. Logo variant selection and placement remain subject to brand-owner approval.

1. Executive control and deliverables

This package specifies WHAT should be assembled in Figma after Step 9, not actual designs. No new functions, features, routes, privileges, checkout options or brand approvals are created here. Every proposed design element must preserve the current requirement-status distinctions.

Reference scope	Quantified handoff
Component families	50 source-derived patterns; 190 proposed visual variant examples
Screen contract references	189 unique Screen IDs; 5 product surfaces
Responsive evidence	430 layout contexts across 189 screens; not 430 automatically-required frames
Prototype references	43 user flow families / 242 documented steps; 2 native payment flows policy-blocked
States/errors	28 UI states / 25 semantic error categories
Permissions	1,323 role-access dispositions inherited; 12 backend staff operations remain DENY_PENDING
Requirement coverage	207 SRS requirement dispositions cross-linked; includes non-UI/out-of-scope entries
Approvals	24 inherited business holds, 10 brand holds, 15 exclusions/conditionals tracked

2. Source precedence and commitment controls

- SRS v0.3 and its §9 client decisions define client-accepted FUNCTIONAL INTENT; original 207 IDs are not supplemented by derived design IDs.
- Step 1 Screen IDs, Step 2 navigation, Step 3 flow IDs, Step 4 functional contracts, Step 5 state/error IDs, Step 6 component IDs and Step 7 responsive contexts are traceability inputs.
- Backend v0.2 is a PROPOSED contract. The 12 Sales/Support DENY_PENDING permissions are not enabled by an illustrated prototype.

- Official brand sources are client-supplied logo variants and #F42524 red / #000000 black; semantic colors, typography, dark mode, file structure and Figma auto-layout choices remain PROPOSED.
- The Magistral Bold Italic font is present in uploaded sources. Application-wide UI usage and licensing are undecided. Font binaries are not included in this package.
- Older SRS yellow/black/white brand mention is superseded as a design reference by newer logo package, pending recorded brand-owner sign-off.
- Client policy: 3 BUSINESS-day advertising refund request from publication; consumer-law validation pending. Three-day expiration grace is an independent clock with unresolved day type.
- “Proto-ready” in this document never means production/payment/legal/role policy approval.

3. Proposed Figma file and page structure

Suggested page structure below is an organizational handoff, not a created Figma file or an externally approved file plan.

Page	Suggested Figma page	Scope / design restriction
PG-01	00_Readme_Controls	Scope, source hierarchy, approval labels, owners, handoff instructions
PG-02	01_Brand_References	Source logo variant placements; institutional chart; font licensing hold
PG-03	02_Foundations_PROPOSED	Color aliases, type, spacing, radius, elevation, icons, responsive and accessibility policies
PG-04	03_Components_Web_Admin	50-component web-candidate library; variants only where relevant
PG-05	04_Patterns_Native_Reference	Platform equivalents specified, not web shadcn components copied
PG-06	05_Admin_Desktop_MainAdmin	53 desktop screen contracts grouped by role and module
PG-07	06_Admin_Sales_Support_HOLDS	Scoped staff contexts, locked operations, assignment and privacy holds
PG-08	07_Admin_Mobile_Essentials	8 essential tasks; no cash entry, no inferred mobile approvals
PG-09	08_Web_Public_Buyer	Public browse, filters, details, favorites, chat
PG-10	09_Web_Seller_Dealership	Seller approval, ads, renewals, payments, reporting
PG-11	10_iOS_Consumer	38 iOS screens; paid checkout branch held
PG-12	11_Android_Consumer	38 Android screens; paid checkout branch held
PG-13	12_Prototype_Flows	43 user-flow storyboard/index; no prohibited checkout simulation
PG-14	13_UI_States_Errors	28 states, 25 error semantics; privacy-safe examples
PG-15	14_Responsive_Evidence	430 reference contexts; not an obligation to duplicate all frames
PG-16	15_Review_Gates_Archive	Unresolved holds, source exceptions, annotation and audit trail

4. Component contract and variants

Reuse all 50 Step 6 component IDs. Source “UI-###” IDs remain stable. Variants are bounded examples for design review, not proof that new interactions are approved. Do not build role permission as visual-only state; inaccessible actions stay inaccessible in backend and any interactive prototype must respect that.

4.1 Foundation

Component / name	Illustrative visual variants	Invariant
UI-001 Brand logo / variant slot	Logo 1 source, Logo 2 source, Logo 3 source, Logo 4 source, Black-and-white source	No recolor/crop; logo variant per background needs approval
UI-002 Page shell / header / footer	base, compact-reference	Role-aware header content and authentic navigation
UI-003 Sidebar / role menu	Main Admin eligible nav, Sales restricted nav, Support restricted nav	Do not expose held staff operations
UI-004 Mobile essential staff navigation	overview-only, essential-list, restricted-action-hidden	Only essential approved mobile tasks; cash absent
UI-005 Breadcrumb / return	base, compact-reference	Does not bypass rights
UI-006 Tabs / segmented scope	base, compact-reference	Variants may not grant new actions

4.2 Action

Component / name	Illustrative visual variants	Invariant
UI-007 Primary action button	default, hover, focus-visible, disabled, loading	Use accessible proposed CTA token, enforce server auth
UI-008 Secondary/outline button	default, hover, focus-visible, disabled, loading	Visually distinct from destructive
UI-009 Destructive confirmation	default, hover, focus-visible, disabled, loading	Must not add unsupported irreversible behavior
UI-010 Dropdown action menu	default, hover, focus-visible, disabled, loading	Protected actions remain hidden/disabled with denial path
UI-011 Inline link / authenticated gate	default, hover, focus-visible, disabled, loading	Guest phone reveal allowed; message requires auth

4.3 Form

Component / name	Illustrative visual variants	Invariant
UI-012 Text and email input	empty, filled, focus-visible, validation-error, disabled	Mandatory only if SRS confirms
UI-013 Password input	empty, filled, focus-visible, validation-error, disabled	Policy parameters not invented
UI-014 Date of birth DD/MM/YYYY	empty, filled, focus-visible, validation-error, disabled	Real date and age 18+ server-side
UI-015 CPF/CNPJ private input	masked-unauthorized, authorized-entry, format-error	Never public; no photo or selfie
UI-016 Phone input / public reveal	phone-hidden, phone-revealed	Before advertising required; buyer signup optional
UI-017 Category / catalogue select	empty, filled, focus-visible, validation-error, disabled	Vehicle category-specific validators pending
UI-018 Filter panel / sort	empty, filled, focus-visible, validation-error, disabled	No GPS-radius search
UI-019 Checkbox / radio option	empty, filled, focus-visible, validation-error, disabled	Optionality and defaults per approved rule only
UI-020 Field validation/error text	empty, filled, focus-visible, validation-	Error strings proposed in pt-BR; server

	error, disabled	wins
UI-021 Action/review notes and reason	empty, filled, focus-visible, validation-error, disabled	Only reason-bearing review; privacy filtering

4.4 Media

Component / name	Illustrative visual variants	Invariant
UI-022 Photo upload and quota	within-plan-quota, at-plan-quota, media-validation-error	5/10 photo quota by plan; media size/type TBD
UI-023 Choose cover image	empty, with-photo, limit-reached, upload-error	Cover chosen from uploaded images

4.5 Discovery

Component / name	Illustrative visual variants	Invariant
UI-024 Vehicle card	default, selected-or-saved, empty-context	No public sold label; do not expose CPF/CNPJ
UI-025 Vehicle detail display	default, selected-or-saved, empty-context	Seller phone reveal separate from message
UI-026 Location selector	default, selected-or-saved, empty-context	Ipatinga default; no automatic GPS
UI-027 Favorite save/remove	default, selected-or-saved, empty-context	Guest must be routed to auth
UI-028 Saved search editor	default, selected-or-saved, empty-context	Alert timing pending

4.6 Data

Component / name	Illustrative visual variants	Invariant
UI-029 Status label / badge	pending, active, expired, removed, rejected	Use text+shape not color alone
UI-030 Sortable/filterable data table	default, loading, empty, restricted	No private columns without field permission
UI-031 Pagination / result summary	default, loading, empty, restricted	Do not assert specific pagination rules
UI-032 Counts/summary metric card	default, loading, empty, restricted	Visitor identity never disclosed
UI-033 Empty/loading/retry	default, loading, empty, restricted	Do not imply counts before data loads

4.7 Feedback

Component / name	Illustrative visual variants	Invariant
UI-034 Alert / toast	informational, error, success, permission-denied	Avoid toast-only critical disclosures
UI-035 Modal / confirmation	informational, error, success, permission-denied	Use full page for complex decisions if necessary
UI-036 Restricted/access denied	unauthenticated, role-denied, record-scope-denied, suspended	Deny protected data/actions server-side

4.8 Messaging

Component / name	Illustrative visual variants	Invariant
UI-037 Chat inbox/thread list	unread, read, offline, read-only	No arbitrary staff private-chat access
UI-038 Text-only chat composer	compose-authorized, read-only-closed-listing, send-error	No attachments; removed threads read-only
UI-039 Presence/read/unread	unread, read, offline, read-only	Precision and retention policy TBD
UI-040 Report, block, hide	unread, read, offline, read-only	Reported-only staff access; no

conversation		unrestricted browser
UI-041 Legacy staff mediation disclosure	legacy-team-disclosure-visible	Never impersonate seller

4.9 Ads

Component / name	Illustrative visual variants	Invariant
UI-042 Plan comparison / selection	30d-per-vehicle, 60d-per-vehicle, dealership-per-vehicle	Only approved per-vehicle plans
UI-043 Revision comparison / moderation	draft, pending-review, approved-or-active, denied-or-expired	Previously approved public version remains until decision

4.10 Payment

Component / name	Illustrative visual variants	Invariant
UI-044 Pix/card pending/success state	website-pending, website-verified, website-failed, native-checkout-hold	Do not mark paid from redirect; native purchase route held
UI-045 Cash record desktop-only	desktop-main-admin-only, all-other-contexts-denied	Never render action in Admin mobile; role enforced backend
UI-046 Refund request and review	request-window-legal-hold, reason-entry, under-manual-review, accepted-and-listing-removed	3 business days from publication intent; lawful exceptions pending

4.11 Safety

Component / name	Illustrative visual variants	Invariant
UI-047 Report-linked moderation view	reported-only, authorized-review, action-confirmed, access-denied	Only reported scope; assignments TBD

4.12 Admin

Component / name	Illustrative visual variants	Invariant
UI-048 Configuration fields and actions	view-only, editable-if-authorized, locked	No unapproved new subscription product

4.13 Account

Component / name	Illustrative visual variants	Invariant
UI-049 Seller approval result/corrections	approval-pending, rejected-with-reason, correction-resubmission, approved	Rejection reason and resubmission
UI-050 Delete account request/status	request-form, under-admin-review, approved-removal, privacy-timing-hold	Retention and store deletion obligations unresolved

5. Design states, field errors and component properties

Step 5 defines 28 reusable states and 25 error semantics; designers may map only applicable states to each screen and must not auto-create 28 mockups per screen. Include initial/loading, success, empty, field validation, permission denial, payment unresolved and suspended/read-only where the screen contract calls for them.

Recommended Figma property axes: State (default, focus-visible, loading, disabled, error), size (responsive candidate), emphasis (primary/secondary where meaningful), iconVisible (if an existing source component supports it). Apply component-level variants only where distinctly useful. No arbitrary business/action variants.

Cross-cutting state/error	Design handling

ST-01, ST-02	Loading vs authorized ready; never flash private data before role/ownership verification
ST-03 + related	Empty result with approved navigation only; never add an invented free-posting CTA
ST-05/06 and error catalogue	Inline errors, retry/recovery only where approved; no raw internal error strings
Restricted states	No forbidden action CTA; explain access limits without sensitive data leaks
Read-only threads	Retain history after ad sold/removed/expired; composer not active
Payment states	Do not mark pending as paid; native checkout is a policy decision hold
Refund states	Do not promise statutory outcome; apply manually-reviewed, legal-gated text

6. Screen-level frame requirements and order

189 one-to-one canonical Screen ID frame references. Frame count is a documentation inventory, NOT guaranteed Figma deliverable quantity or a requirement to produce every possible form/state variant. Responsive contexts (430) are review dimensions, not 430 new features or mandatory separate frames. See Excel “Screen Frames 189” and “Adaptation Refs 430” for each ID.

Admin Dashboard — desktop

53 canonical screen entries. UI priority: 1 / Admin first.

Module / design section	Screen IDs (abbreviated count)
Identity / access	1 screen(s)
Overview	1 screen(s)
Accounts & seller eligibility	9 screen(s)
Advertising operations	12 screen(s)
Payments & revenue	8 screen(s)
Moderation & deletion	6 screen(s)
Team administration & managed work	7 screen(s)
Configuration	9 screen(s)

Desktop special gate: ADM-D-026 (cash record) is Main Admin-only and must not appear in Admin mobile design. Final advertisement approval is Main Admin-only; no delegated Sales/Support approval.

Admin Dashboard — mobile essentials

8 canonical screen entries. UI priority: 1 / Admin first.

Module / design section	Screen IDs (abbreviated count)
Essential staff overview	1 screen(s)
Essential account review	1 screen(s)
Essential ad review	2 screen(s)
Essential reports/alerts	2 screen(s)
Staff assignment - pending	2 screen(s)

Essential browser access only. Mobile advertisement approvals remain unresolved and must not be offered as active actions; no cash recording at all.

Website

52 canonical screen entries. UI priority: 2 / Website.

Module / design section	Screen IDs (abbreviated count)
Public discovery	7 screen(s)
Identity & account	8 screen(s)
Advertiser eligibility	4 screen(s)
Seller & dealership hub	3 screen(s)
Listing creation & management	17 screen(s)
Saved collections	3 screen(s)
Messages	6 screen(s)
Refunds & public information	4 screen(s)

iOS app

38 canonical screen entries. UI priority: 3 / Native apps.

Module / design section	Screen IDs (abbreviated count)
Discovery	5 screen(s)
Account & identity	8 screen(s)
Advertiser eligibility	3 screen(s)
Listings & advertising	13 screen(s)
Saved items	2 screen(s)
Messages	4 screen(s)
Payments & information	3 screen(s)

IOS-023 is a checkout policy hold. Design only review annotation/alternative decision placeholder, NOT a functioning in-app purchase or unapproved external PSP redirect.

Android app

38 canonical screen entries. UI priority: 3 / Native apps.

Module / design section	Screen IDs (abbreviated count)
Discovery	5 screen(s)
Account & identity	8 screen(s)
Advertiser eligibility	3 screen(s)
Listings & advertising	13 screen(s)
Saved items	2 screen(s)
Messages	4 screen(s)
Payments & information	3 screen(s)

AND-023 is a checkout policy hold. Design only review annotation/alternative decision placeholder, NOT a functioning in-app purchase or unapproved external PSP redirect.

7. Prototype coverage: 43 source flow families

All prototype references correspond to Step 3 UF IDs. A prototype is a set of navigation and presentation requirements; it is not a functioning app, authorization mechanism or payment integration. Every allowed walkthrough should show trigger, steps/decision, result, and at least one relevant error/denial when authorized by the source behavior.

Flow	User goal	Treatment / guard
UF-01	Public browse, locality, filter and sort	CONFIRMED_CORE

UF-02	Vehicle details, public phone and dealership view	CONFIRMED_CORE
UF-03	Email registration, age gate and sign-in	CONFIRMED_CORE
UF-04	Social sign-in with approved providers	CONFIRMED_CORE_WITH_CONDITIONAL_BRANCH
UF-05	Profile, notification preferences and legal/contact information	CONFIRMED_CORE_WITH_POLICY_HOLD
UF-06	Individual seller eligibility application	CONFIRMED_CORE_WITH_PRIVACY_HOLD
UF-07	Main Admin seller/dealership approval and rejection	CONFIRMED_CORE_WITH_FIELD_POLICY_HOLD
UF-08	Dealership eligibility and public profile	CONFIRMED_CORE_WITH_FIELD_HOLD
UF-09	Approved seller creates advertisement draft and photo set	CONFIRMED_CORE_WITH_FIELD_HOLD
UF-10	Main Admin advertisement approval, rejection and corrections	CONFIRMED_CORE
UF-11	Website advertising payment via Pix or credit card	CONFIRMED_INTENT_PROVIDER_GATED
UF-12	Main Admin records genuine offline cash on desktop	DESKTOP MAIN ADMIN ONLY; no mobile cash recording
UF-13	Publication entitlement, receipts and listing state	CONFIRMED_CORE_WITH_PROVIDER_HOLD
UF-14	Published listing revision review preserves previous version	CONFIRMED_CORE
UF-15	Manual renewal within expiry grace	CONFIRMED_CORE_EDGE_GATED
Flow	User goal	Treatment / guard
UF-16	Unrenewed grace lapse and fresh-submission rule	CONFIRMED_CORE_EDGE_GATED
UF-17	Featured boost purchase and activation	CONFIRMED_CORE_PURCHASE_GATED
UF-18	Seller marks sold and immediately removes public listing	CONFIRMED_CORE
UF-19	Favorites, saved searches and matching alerts	CONFIRMED_CORE_CADENCE_HOLD
UF-20	Advertiser listing-view analytics	CONFIRMED_CORE_METRIC_HOLD
UF-21	Buyer starts listing-specific realtime text conversation	CONFIRMED_CORE
UF-22	Seller replies to buyer-created conversation	CONFIRMED_CORE
UF-23	Block, report or hide a conversation	CONFIRMED_CORE_WITH_PRIVACY_HOLD
UF-24	Admin reports moderation and restricted chat evidence	CONFIRMED_CORE_STAFF_GATED
UF-25	Admin legacy carryover listing intake (no owner account)	CONFIRMED_CORE_DATA_GATED
UF-26	Legacy buyer enquiry transparently answered by staff	CONFIRMED_INTENT_STAFF_GATED
UF-27	Customer advertising/boost cancellation and refund request	Consumer-law refund policy gate; 3 business days is client intent, not legal approval
UF-28	Main Admin financial refund case review and accepted removal	Consumer-law refund policy gate; 3 business days is client intent, not legal approval
UF-29	Transaction history, receipt and revenue export	CONFIRMED_CORE
UF-30	Card dispute and chargeback investigation	CONFIRMED_CORE_PROVIDER_GATED
Flow	User goal	Treatment / guard

UF-31	Suspend or block violating user and hide ads	CONFIRMED_CORE_PRIVACY_GATED
UF-32	User account deletion request and Main Admin review	CONFIRMED_CORE_LEGAL_GATED
UF-33	Main Admin staff identity, roles and assignments	CONFIRMED_CORE_FIELD_GATED
UF-34	Support customer information corrections (permission-gated)	DENY_PENDING staff actions until signed fine-grained grants
UF-35	Sales/Support customer-managed listing drafting (permission-gated)	DENY_PENDING staff actions until signed fine-grained grants
UF-36	Main Admin advertising and directory settings	CONFIRMED_CORE_WITH_SEMANTIC_HOLD
UF-37	Main Admin homepage, template, contact and legal content	CONFIRMED_CORE_WITH_POLICY_HOLD
UF-38	Admin mobile essential task overview, no cash or approval assumption	MOBILE ESSENTIALS ONLY; no cash; no assumed mobile approval
UF-39	iOS paid listing or boost checkout route — unresolved	BLOCKED_POLICY_DECISION — REVIEW ANNOTATION ONLY
UF-40	Android paid listing or boost checkout route — unresolved	BLOCKED_POLICY_DECISION — REVIEW ANNOTATION ONLY
UF-41	Event-driven notices and notification preferences	CONFIRMED_CORE_TIMING_HOLD
UF-42	Read-only messaging after listing closure	CONFIRMED_CORE
UF-43	Dealership multi-vehicle per-ad plan workflow	CONFIRMED_CORE

8. Prototype interaction contract and handoff annotations

- Navigation connections must follow Step 2 route eligibility for the specific actor and Step 4 Screen ID. A click target on a Figma board is NOT permission to call an API.
- Admin paths: include Main Admin approval/rejection and correction reason; leave submitted/edited live listing published only at its last approved version until approved revision replaces it.
- Buyer-to-seller messaging: buyer starts from listing; text only; seller reply; no seller unsolicited first-message, media attachments or purchase/deposit payment.
- Legacy enquiry: public telephone is actual owner; in-platform staff replies visibly attributed to Feira de Carros and not impersonating owner.
- Cash record storyboard: desktop Main Admin only, actual external cash, no simulated successful gateway transaction; activation only when confirmed.
- Refund storyboard: request reason, manual team review, accepted cancellation removes public ad; specific refund policy rights and boost start are held.
- Permission storyboard: 12 DENY_PENDING staff operations should show a restricted access annotation, not an interactive flow that accomplishes the operation.
- iOS/Android billing: UF-39 and UF-40 exist as annotated policy gates only; never simulate a completed unauthorized in-app listing/boost purchase.
- Transactional/billing status screens on mobile are not automatically checkout screens; receipt or payment history can remain read-only where approved.
- Analytics: aggregate daily/total views and approximate visitor city/state; do not add visitor identities.

9. Responsive & accessibility implementation notes

- Review Step 7 24 responsive patterns and 430 contexts. Compose responsive layouts using auto layout, content constraints and accessible reading order; breakpoint proposals do not bind client-supported devices.
- Desktop Admin tables may collapse to permitted summaries; mobile web must preserve authorized actions but cannot gain desktop-only cash or unresolved approval ability.
- Native apps should use platform-appropriate iOS/Android component equivalents. Web shadcn/ui components are not assumed to run natively.
- Include keyboard focus visibility, clear field labels, errors associated with controls, truncation checks, scalable text and meaningful noncolor status labels. Numerical accessibility target needs final approval.
- Avoid small white body text on source official red #F42524 (contrast about 4.09:1); any alternative button shade is an UI proposal, not a new official brand color.
- Do not use real ID numbers, phone numbers, DOB, buyer conversations, card information or payment secrets in mock data.

10. Brand assets, tokens, and shadcn/ui integration status

Asset/technology	Source classification	Handoff treatment
Logo 1–4, black/white versions	Source artwork present	Use source media unchanged; select correct placement only after brand review
#F42524 / #000000	Official institutional chart	Brand anchor tokens only; do not infer full accessible UI palette
Magistral Bold Italic	Font asset supplied	Logo/brand reference; UI usage, licensing and distribution pending
Other semantic colors	Step 6 proposals	Review WCAG interactions and brand-owner decisions
shadcn/ui	Proposed web/Admin implementation	Components/variants mapped for handoff; no fully designed web library yet
React Hook Form + optional Zod	Proposed web/Admin form implementation	Field specification from Step 5; server validates business constraints
Native mobile components	Implementation not selected	Keep iOS/Android specs and platform rules separate

11. Explicit design holds & non-negotiable scope limits

Hold group	Count	Treatment
Business / security / payment	24 inherited	Tagged per screen/flow; cannot claim closed
Brand / typography / palette	10 brand-specific	Only source colors and artwork confirmed
Excluded/conditional features	15 referenced	No production Figma frame or actionable prototype unless explicit approval

- CPF document photograph and selfie are outside current scope.
- Video direct upload and YouTube are conditional, not committed.
- No vehicle purchase, deposit, ownership transfer or escrow payment UI.
- No device GPS-radius search, dealership bulk subscription, auto-renew billing or chat image/document attachment.

- No unrestricted private conversation browsing by staff; moderation limited to reported context under authorized access.

12. Step 9 audit requirements and acceptance criteria

- Validate every proposed Figma frame ID against the 189 canonical Screen IDs and Step 1–7 matrices. Unmapped frames must be removed or scope-reviewed.
- Verify all 50 component IDs, 43 prototype flow IDs, 207 SRS dispositions and 1,323 role-access records remain consistent.
- For each actual Figma prototype link, confirm user role, navigation authorization, expiry state, and pending external gate (if any).
- Obtain brand owner decisions on final logo use, typography licenses, semantic palette and accessible control contrasts.
- Resolve or explicitly accept design holds (native billing, PSP, legal refund wording, CPF retention, sensitive staff permissions, grace cutoff, legacy dataset, app support) before finalizing affected flows.
- Check 28 states / 25 error semantics are represented where applicable; do not demand them uniformly on every screen.
- Inspect approved responsive layouts and prioritize Admin Dashboard desktop + essential mobile, website, then native apps.
- Distinguish reviewer acceptance of documentation from approval to implement designs, payment service, legal policy or operational security.
- Do not begin Figma without the Step 9 handoff decision and approval-gated backlog.

13. Documentary QA results

35/35 internal structural checks passed. They verify inherited IDs, reference coverage, restrictive source interpretations and file completeness only. No Figma prototype navigation has been built or tested.

Control	Result
Step4 screen base exactly 189	PASS
Screen IDs unique	PASS
Step6 component base exactly 50	PASS
Component IDs unique	PASS
Step7 context base exactly 430	PASS
All contexts map to a known screen	PASS
All 189 screens have contexts	PASS
All 189 screens have Step6 component crosswalk	PASS
All crosswalk component IDs exist	PASS
All 189 frames have SRS IDs	PASS
Referenced screen SRS IDs exist	PASS
Component SRS IDs exist	PASS
43 source flow families retained	PASS
242 source steps retained	PASS
All interaction step flow refs valid	PASS
All step screen refs valid	PASS
Role permissions inherited	PASS
207 SRS dispositions retained	PASS
28 UI states retained	PASS
25 error categories retained	PASS

24 source business holds retained	PASS
10 branding holds retained	PASS
15 exclusions and conditionals retained	PASS
Native checkout screens annotated policy holds	PASS
Cash frame desktop only	PASS
Blocked flows not coded clickable checkout	PASS
All component variants scoped to source	PASS
Official colors not reassigned	PASS
Proposal-only Figma naming	PASS
No new feature screens	PASS
All 5 surfaces represented	PASS
24 source responsive patterns preserved	PASS
All 43 flows have storyboard entry	PASS
No official font file shipped	PASS
Terms only proposed if unsanctioned	PASS

14. Full machine-readable annex references

The companion workbook contains the exhaustive screen-by-screen and cross-cutting registers: 189 canonical frame entries, 430 responsive contexts, 50 components and 190 candidate examples, 43 prototype flows, 242 interaction steps, 1022 component-to-screen links, 1,323 role rows, 207 SRS reverse records, 28 states, 25 errors, 24 business holds, 10 brand holds and 15 scope boundaries. Excel rows—not summary prose—are the controlled reference for Step 9.
